Information on the actions taken and the distribution status for the notified products may be found on this website by filling in the reference number of the product of interest.

All EU RASFF notifications since 1979 are available on this DG SANCO portal database.

The different types of notifications are the following:

- **Alert notifications** are sent when a food presenting a serious risk is on the market and when immediate action is required. Alerts are triggered by the Member State that detects the problem and has initiated the relevant measures, such as withdrawal/recall.

- **Information notifications** concern a food or feed that was placed on the market for which a risk has been identified, but for which the other members of the network do not have to take immediate action, because the product has not reached their market or is no longer present on their market or because the nature of the risk does not require any immediate action.

- **Border rejection notifications** concern food and feed consignments that have been tested and rejected at the external borders of the EU (and the European Economic Area) when a health risk was found. The notifications are transmitted to all European Economic Area border posts in or

The "action taken" field represents the action already taken or to be taken by the notifying country at the time of notification. If "no action taken" is given for an alert notification, this normally indicates that the product is not on the market of the notifying country (therefore: no action

The "distribution status" field indicates knowledge existing at the time of notification about the possible distribution of the product on the market. The concept "market" is to be interpreted in a geographical way: "the internal Community market" i.e. this does not necessarily mean that
